TECHNICAL DESCRIPTION

- The machine has been specifically designed to perform grinding, cleaning, polishing of round or elliptical pipes with a diameter from 4 to 20 mm, with variable bends.
- Machine's purpose is external pipe's surface working, both straight and bent. The piece does not rotate but it moves along the machines working axis.
- Minimum effort required from the operator
- Full interlocked guarding with emergency stop.
- Machine is prepared for the connection of a self-filtering suction system for the collection of the dust both from the machine's body and from the hood.
