

The Aceti Art 24 abrasive disc grinder is a heavy duty machine designed for the rigors of a production environment.

The twin speed motor allows for more control as the correct speed can be selected for the work being processed. The controls use low voltage components and the unit has a built in DC injection breaking system.

The disc sander takes a 400mm diameter disc and comes with a fully orientable table from 0-90 degrees allowing for precise angles to be sanded. The solid disc means that there is no give between the disc and the plate allowing for good levels of flatness to be achieved easily.

The machine is fully guarded and can be completely covered when not in use.

Specification	
Motor (twin speed) (415v)	1.8 kW
Motor Speed	1400 & 2800 rpm
Abrasive Disc Size	400 mm
Table Size	450 x 230 mm
Noise in average working conditions dB (A)	70
Overall dimensions (width/depth/height)	600 x 800 x 1300 mm
Net weight Kg.	105Kg

Options include

Small built in extractor
