

HYCON HCS14 UW CUT-OFF SAW

QUICK BLADE STOP

LOW WEIGHT – COMPACT SIZE

RAIL MOUNTABLE

PRODUCT FEATURES

The HYCON HCS14 underwater cut-off cut all types of concrete, steel, rock, etc. The HYCON cut-off saw is a very sturdy tool for cutting even under extreme conditions. Cutting pillars or other large items, which heavy machinery cannot reach is no obstacle for the HCS underwater cut-off saw.

The HCS 14 underwater features pre-drilled holes in the shielding for easy cleaning.

The hydraulic cut-off saw from HYCON can be used for horizontal and vertical cutting. The saw stops automatically if the blade jams thanks to the system pressure relief valve. When releasing the trigger, the blade stops rotating a maximum of 10 sec., ensuring no injury to the diver.

Hydraulic direct drive high-quality motor ensures a minimum of service.
